Professional Summary

Data-driven Product Manager and Engineer combining a strong technical background with deep UX design expertise. Proven track record of bridging the gap between product strategy, user-centred design, and engineering execution. By rigorously analysing problem spaces and leveraging data, I ensure products deliver genuine business value before a single line of code is written. Adept at leading cross-functional teams to translate complex requirements into accessible, high-impact digital products.

Core Competencies

- **Product Management & Strategy:** Project Management, Product Discovery, Roadmap Planning, Conversion Rate Optimisation, A/B Testing, Usability Testing, Agile (Scrum/Kanban).
- **UX & Product Design:** Branding & Identity, Design Systems, High-Fidelity Prototyping, Interaction Design, User Journey Mapping, Figma, Web Accessibility (WCAG 2.2).
- **Technical Engineering:** System Architecture, Information Architecture, REST APIs, Front-End Development (React.js, Node.js, TypeScript), Git, Content Management Systems, Feature Flagging.
- **Data, Analytics & Tools:** Product Analytics (Google Tag Manager, Looker Studio, Microsoft Clarity), Artificial Intelligence, Customer Relationship Management.

Professional Experience

100Green · Product Manager

APR 2025 - PRESENT

- **Product Ownership & Growth:** Owned end-to-end product delivery for the new energy quote journey, redesigning the experience to deliver a 25% increase in sign-ups.
- **Scoping & Delivery:** Led the technical scoping and delivery of conversion funnel updates by leveraging a hands-on technical background to resolve technical functionality blockers and provide as much value as possible for internal teams.
- **Data & Communication Pipelines:** Built automated email workflows, collaborating closely with Data Analysts to map SQL query logic to customer profiles and communications.
- **Analysis & UX:** Championed continuous product discovery and A/B testing, translating user behaviour audits (Microsoft Clarity, Google Tag Manager) into compliance-driven UX updates.
- **UI/UX Prototyping:** Bridged the gap between product features and technical deployment by developing comprehensive wireframes and high-fidelity UI prototypes in Figma.
- **Technical Strategy & Integrations:** Partnered with executive leadership to define the company's tech and automation strategy – balancing technical debt with delivery speed. Initiated the end-to-end implementation of Zendesk (software/hardware), webchat, and robust API/webhook integrations with other industry partners to optimise the overall tech stack.

ITS · Frontend Developer

JUN 2021 - APR 2024

- **Conversion Optimisation:** Acted as a product lead within an Agile delivery team, partnering with stakeholders to ship iterative frontend updates that drove a 37.5% increase in conversion rates.
- **Component Architecture:** Developed a component architecture for the needs of users, building scalable UI solutions and data schemas for high-traffic ecommerce product pages (PLPs/PDPs) to ensure a seamless user experience across a family of web applications.
- **Quality Assurance & Testing:** Improved product quality and testing standards, establishing automated end-to-end testing (Playwright, Cypress) that significantly reduced production bugs.
- **Performance Engineering:** Prioritised and executed a performance roadmap to optimise state management to improve Core Web Vitals, page load speeds, and platform accessibility.
- **Email Infrastructure & Integrations:** Architected a personalised email segmentation ecosystem using third-party platform APIs (Klaviyo, Dotdigital, Fresh Relevance).

ITS · Designer

JUL 2019 - JUN 2021

- **Platform Migration & Design Systems:** Co-led the strategic migration from a legacy CMS to BigCommerce, building a scalable design system that elevated the overall e-commerce experience.
- **Data-Driven UX:** Leveraged product engagement data to uncover core user needs, translating behavioural insights into continuous improvements across key user journeys.
- **Operational Efficiency:** Streamlined internal operations by establishing data-driven templates and new design workflows, significantly increasing output quality across the marketing, design, and development teams.

Freelance · Product Engineer

JUL 2019 - PRESENT

- **End-to-End Development:** Engineered and deployed custom web applications, leveraging AI-assisted workflows and automated CI/CD pipelines to accelerate backend development.
- **Discovery & Scoping:** Consulted with diverse clients to define clear product roadmaps, conducting early market research to establish project scopes that directly aligned with core business objectives.
- **Product Delivery:** Directed full-lifecycle product delivery, translating high-fidelity Figma prototypes and complex user journeys into robust, bespoke frontend solutions.
- **Technical Consulting:** Consulted on backend architecture and custom software solutions, streamlining client operations and improving long-term business scalability.
- **Open-Source Collaboration:** Partnered with international developer communities on GitHub, building standalone features, optimising code, and elevating the design and performance of digital products.

Education

- **Claude Code in Action** · Anthropic
- **AI Fluency: Framework & Foundations** · Anthropic
- **Google UX Design** · Google
- **BA Graphic Communication** · Norwich University of the Arts
- **Graphic Design Extended Diploma** · Harlow College
